## Professional Summary

Computer Science undergraduate with hands-on experience building **real-world full-stack and AI-driven systems**, from designing user interfaces and REST APIs to integrating machine learning models and databases. Seeking a **Software Engineering Internship** to solve real-world problems, contribute to impactful software products, and grow into a strong, versatile software engineer.

## Education

**Velagapudi Ramakrishna Siddhartha Engineering College** — Vijayawada, India
*B.Tech in Computer Science and Engineering; CGPA: 9.37/10* — *Aug 2023 – May 2027*

**Sri Saraswathi Junior College** — Ongole, India
*Higher Secondary Education (Class XII); Percentage: 98.2%* — *Jun 2021 – May 2023*

**Saint Joseph's English Medium School** — Ongole, India
*Secondary Education (SSC, Class X); Percentage: 100%* — *Jun 2020 – April 2021*

## Projects and Publications

**Chronic Liver Disease Detection and Staging via Daily Health Records using TabNet** *Aug 2025 – Oct 2025*
*React, Flask, REST APIs, JavaScript, SQLite, TabNet (Python)*

- Designed and built the **React front-end** for a clinical screening tool, creating reusable UI components for patient data entry, historical record lookup, and result visualization consumed via REST APIs.
- Integrated the interface with a **Flask backend** to auto-populate missing daily health fields from historical SQLite records, reducing manual data entry steps for the end user during repeat screenings.
- Paired the front-end with a **TabNet deep-learning pipeline**, achieving **95.60% accuracy** for disease-type prediction and **97.10% accuracy** for stage prediction, providing clinicians with a usable interface for the model; work co-authored into a **research paper accepted for publication**.

**Medical Misinformation Detection Browser Extension** *Ongoing*
*JavaScript, Browser Extension APIs, FastAPI, Python, NLP*

- Building a **browser extension frontend** that scans YouTube health and medical content client-side and surfaces real-time misinformation flags directly in the video UI.
- Architecting the **extension-to-backend REST API** using FastAPI to route caption data to a **PubMedBERT-based NLP classifier** without blocking the browser UI thread.

## Technical Skills

**Programming Languages:** C, Java, Python, SQL
**Frontend Development:** HTML, CSS, JavaScript, React.js
**Backend Development:** REST APIs
**AI / Machine Learning:** Deep Learning
**Databases:** MySQL, SQL
**Computer Science:** Object-Oriented Programming, Operating Systems, DBMS, Computer Networks, System Design Basics
**Cloud Computing:** AWS
**Tools & IDEs:** Git, GitHub, VS Code

## Certifications

- **AWS Solutions Architect**
- **AWS Cloud Practitioner**
- **ServiceNow CAD**
- **ServiceNow CSA**
- **IBM: Developing Front-End Applications with React**
- **Java Programming Fundamentals**
- **CCNA: Enterprise Networking, Security, and Automation**
- **CCNA: Switching, Routing, and Wireless Essentials**
- **CCNA: Introduction to Networks**

- **Python Essentials 2**
- **Python Essentials 1**
- **CLA: Programming Essentials in C**
- **IBM: Django Application Development with SQL and Databases**
- **IBM: Introduction to HTML, CSS, and JavaScript**
- **IBM: Getting Started with Git and GitHub**
- **Social Networks**
- **AI Fundamentals**

## Workshops & Mentorship

- **FFE Student Mentorship Program – Outstanding Mentee** – Received the **Outstanding Mentee** recognition from Foundation For Excellence (FFE) for FY 2025–26, with guidance in problem-solving, communication, consistency, and career preparation.
- **Clean Code and Software Craftsmanship** – Attended a session covering SOLID principles, code refactoring, maintainable design, and software craftsmanship best practices.
- **Design Thinking Workshop** – Attended a DotSphere workshop covering design thinking principles, user-centric problem-solving, ideation, and solution development.
- **1-Day AI Tools Workshop** – Attended a Be10X workshop on using AI tools such as ChatGPT for productivity, automation, research, content creation, and problem-solving.

## Achievements

- Solved **550+ problems on LeetCode** across core and advanced Data Structures and Algorithms, strengthened problem-solving skills through a **10-month DSA Bootcamp by Amazon**.
- Secured **4th place** in a coding competition at **RVR & JC College of Engineering**, competing in a **2-member team** and demonstrating efficient problem-solving under time constraints.
- Selected as an **Aspire Campus Leader (Ambassador)** from participants of the **Aspire Leaders Program by Aspire Institute**, recognizing leadership, communication, and active engagement in program initiatives and webinars.
- Achieved **79.83 percentile** in the **TCS National Qualifier Test (NQT)**, demonstrating proficiency in **quantitative aptitude, logical reasoning, and verbal ability**.
- Represented the district at a **Youth Summit**, participating in discussions on **design thinking, innovation, critical thinking, and women empowerment**.
- Participated in the **National-level Versatility Quest 2023**, demonstrating multilingual communication in **English, Hindi, and Telugu** and participating in a theme-based drawing competition.
