Education

Velagapudi Ramakrishna Siddhartha Engineering College

B.Tech in Computer Science and Engineering; CGPA: 9.37/10

Vijayawada, India

Aug 2023 – May 2027

Projects

Chronic Liver Disease Detection and Staging via Daily Health Records

[\[Certificate\]](#)

- Built a machine learning system to predict liver disease type and stage using clinical data.
- Achieved **95.6% classification accuracy** and **97.1% staging accuracy** using TabNet.
- Developed an end-to-end pipeline with **Flask backend, React frontend, and MySQL database**.
- Performed data preprocessing and handled missing values using historical patient records.

Event-Driven Ride Notification System (RabbitMQ)

- Engineered an event-driven system using **RabbitMQ (CloudAMQP)** for real-time ride request distribution.
- Designed a **fanout exchange architecture** to broadcast events to multiple consumers.
- Simulated concurrent ride requests to evaluate system scalability and throughput.
- Enabled asynchronous communication for **low-latency and loosely coupled services**.

PathForge AI – Personalized Career Roadmap Coach

- Built a full-stack AI platform to generate personalized career roadmaps based on user skill assessments.
- Developed backend using **FastAPI** and integrated **LLM APIs** for dynamic roadmap generation.
- Built frontend using **React** with real-time progress tracking and analytics dashboards.
- Implemented skill gap analysis and adaptive learning modules with AI-driven feedback.

Technical Skills

Languages: Python, Java

AI / ML: TabNet, scikit-learn, Pandas, NumPy

Backend Development: Java (Servlets, JSP), Flask, FastAPI, REST APIs

Core CS: Operating Systems, DBMS, Computer Networks

Concepts: Object-Oriented Design, Data Structures & Algorithms, System Design Basics

Tools: Git, GitHub, Linux, VS Code, IntelliJ, Jupyter Notebook

Databases: MySQL, SQLite

Achievements

- Solved **450+ problems on LeetCode** across diverse DSA topics; completed a **10-month Amazon DSA Bootcamp** [\[Certificate\]](#).
- Completed the **Amazon Hi-Touch Communication Program**, enhancing communication and interpersonal skills [\[Post\]](#).
- Secured **4th place in a coding competition** at RVR & JC College of Engineering [\[Certificate\]](#).
- Selected as **Aspire Campus Leader (Ambassador)** under the Aspire Leaders Program (in collaboration with Harvard University); drove **300+ student registrations** through outreach and engagement initiatives [\[Post\]](#).
- Achieved **80th percentile in TCS NQT**, demonstrating strong analytical and problem-solving skills [\[Certificate\]](#).

Certifications

- **AI Fundamentals – Amazon + NavGurukul** [\[Link\]](#)
- **Java Programming Fundamentals – Infosys Springboard** [\[Link\]](#)
- **Python Essentials – Cisco** [\[Link\]](#)
- **CCNA – Introduction to Networks** [\[Link\]](#)
- **Developing Front-End Applications with React – IBM** [\[Link\]](#)
- **Django Application Development with SQL and Databases – IBM** [\[Link\]](#)
- **Getting Started with Git and GitHub – IBM** [\[Link\]](#)
- **Generative AI: Elevate Your Software Development Career – IBM** [\[Link\]](#)
- **Full Stack Software Developer Assessment – IBM** [\[Link\]](#)
