Career Objective

Computer Science Engineering student skilled in Java, Data Structures and Algorithms, and ServiceNow. ServiceNow Certified System Administrator interested in enterprise application development and workflow automation, seeking an opportunity at TCS to apply technical expertise and grow as a software professional.

Education

B.Tech in Computer Science and Engineering

2023–2027

Velagapudi Ramakrishna Siddhartha Engineering College (VRSEC)

CGPA: 9.24/10

Projects

Enterprise Nexus 360 – Employee Lifecycle & Workplace Management System

Jun 2026 – Jul 2026

Tech Stack: ServiceNow, Custom Tables, Flow Designer, Business Rules, Script Includes, Client Scripts, UI Policies, ACLs, Service Portal, Reports & Dashboards

- Built a centralized ServiceNow application to streamline employee onboarding, asset management, procurement, and workplace service processes.
- Configured workflows, Business Rules, Script Includes, Client Scripts, UI Policies, and ACLs to automate processes and enforce role-based access.
- Developed a Service Portal, reports, and dashboards to improve self-service and provide better visibility into employee and IT operations.

Chronic Liver Disease Detection and Staging via Daily Health Records *Academic Project — Aug 2025 – Oct 2025*

Tech Stack: Python, TabNet, Flask, React, REST APIs, SQLite

- Developed a system to predict chronic liver disease type and stage from demographic, clinical, and laboratory data for accessible health screening.
- Built the deep learning pipeline and backend integration with automated retrieval of missing daily health values from historical SQLite records.
- Achieved **95.60%** disease and **97.10%** stage prediction accuracy; the associated research paper has been accepted for publication and is currently awaiting Scopus indexing.

Internship

APSCHE Short-Term Virtual Internship Program – ServiceNow

Ongoing

Tech Stack: Incident Management, SLA Management, Flow Designer, UI Policies, Virtual Agent, ACLs/RBAC, Reports & Dashboards

- Working on a ServiceNow solution to improve how organizations manage SLA-related incidents by addressing delayed risk identification, inconsistent breach tracking, and limited visibility into SLA accountability.
- Configuring SLAs, workflows, UI Policies, Virtual Agent, access controls, reports, and dashboards to gain hands-on ServiceNow administration experience and improve SLA tracking and accountability.

Technical Skills

- **Programming Languages:** Java, Python
- **ServiceNow:** App Engine Studio, Flow Designer, Business Rules, Script Includes, Client Scripts, UI Policies, ACLs, Service Portal
- **Web Technologies:** HTML, CSS, JavaScript, React, Flask, REST APIs
- **Databases:** MySQL, SQLite
- **Tools:** Git, GitHub, VS Code

Certifications

- **ServiceNow Certified System Administrator (CSA)**
- Infosys Springboard – Java Programming Fundamentals
- IBM – Developing Front-End Applications with React
- IBM – Getting Started with Git and GitHub

Achievements & Activities

- Completed a rigorous **10-month Amazon DSA Bootcamp**, solving **450+ problems on LeetCode** while strengthening algorithmic problem-solving skills through structured practice, peer collaboration, and discussion of diverse approaches.
- Secured **4th Place** in an inter-college coding competition conducted by RVR & JC College of Engineering.
- Selected as an **Aspire Campus Leader** through the Aspire Leaders Program, engaging with global leaders and Harvard University faculty through exclusive leadership and professional development sessions.
- Awarded a **Rs.50,000 merit scholarship annually** for academic excellence since the first year of B.Tech.
